

ETERNAL LIGHT

The Eternal Light emergency flashlight, the world's most reliable flashlight, guarantees light without batteries, forever !

Indestructable, the Eternal Light is essential for disaster kits as well as outdoor activities, and a must have for any car owner to keep in the trunk.

Shaking the torch causes a high strength magnet to pass back and forth between a wire coil, powering the ultra white bright LED - shaking for 30 seconds gives minutes of light.

The Eternal Light is virtually guaranteed for life, the LED lasts over 100,000 hours and the flashlight can be recharged over a million times.

Water proof - can be submerged - unbreakable and chemical resistant the Eternal Light works in the most extreme environments - from the sub zero arctic conditions to intense desert heat.

CAUTION: ETERNAL LIGHT must be fully charged for the first use.
